Moving Design Checking to the Front of the Process

Checking designs during specification/entry allows you to find downstream issues early. Design Checker provides an integrated specification and checking environment that detects your design rule violations and provides organization and debugging techniques to textually and graphically track down and fix problems.

Date and Time:

On request (in German)

Register Now:

[mailto:marion.camphausen@trias-mikro.de?subject=Design Checking](mailto:marion.camphausen@trias-mikro.de?subject=Design%20Checking).

After registering you will receive an email confirmation including the URL for the web-presentation and meeting password together with the telephone number and Conference-ID for the voice transmission.

Requirements: Internet access and telephone.
